

Comprehensive Cardio-Vascular Services

Heart Smart, a leading provider of telemedicine monitoring and diagnostic services, was founded on our belief that each and every patient is entitled to the very best of care.

We feel that in today's ever-changing marketplace, it is imperative that we all combine our knowledge and talents to not only lower healthcare costs, but to respond proactively and adroitly to any and all reforms.

Heart Smart is known for its outstanding service commitment to patients and physicians. Our product line is centered on superior medical equipment that enhances diagnostic analysis and accommodates patient needs.

Because we are privately owned, and not a subsidiary of an equipment manufacturer -- like many companies are -- we are able to offer physicians the choice of prescribing whatever brand of cardiac ambulatory recorders that is best indicated for each individual patient.

Founded in 1999, Heart Smart was established in response to the alarming statistics of cardiac health of America. In the United States, total cardiovascular disease mortality ranks as the leading cause of death. Looking at specific age groups, cardiovascular disease is No. 1 for age 65 and older, No. 2 for ages 0-14 and 25-64, and No. 3 for ages 15-24, accounting for more than 40% of all deaths. One person dies every 33 seconds from cardiovascular disease. Heart Smart has taken on the responsibility of combating the deadly statistics of modern living.

Please scrutinize our site, become familiar with our products and services and learn why patients such as C.H. from New Jersey wrote us with this positive feedback:

"I want to commend you on the exemplary service I received from your company. At a time when I was frightened and anxious about what was happening to me, your people were very supportive. All of your people were very professional and very patient, understanding and supportive, which helped quell the anxiety I was feeling."

We encourage you to call us at anytime for any reason. We truly want to earn your trust and confidence.
